

## Job Posting: IT Systems Administrator

Cannamark Inc is a biotech business serving global cannabis markets. We are a non-marijuana business, and license our intellectual property to companies that wish to manufacture CBD or THC products using our water soluble powder technology. This is a novel, patent-pending process that makes us a leader in this emerging industry.

We are small currently, but growing fast! If you have interest and skills in IT systems, sys admin work, and website maintenance we would love to talk with you. The role will be contract to start, and evolve to full time. Our goal is for this individual to eventually assume responsibility for all backend IT operations at the company. If you're looking to work in an awesome environment on groundbreaking technology then this opportunity might be for you!

Please send resumes to [jobs@cmrkinc.com](mailto:jobs@cmrkinc.com). If you have any questions about our company, or the role itself my number is 970.314.1389.

### Required skills:

Working knowledge of Javascript, HTML, bootstrap, & SEO for the management of our website.

Working knowledge of Linux systems and use of command console.

General knowledge of server backend operations & willingness to learn more.

### Desired Skills:

Perl 5 - we use lemonLDAP as our authenticator which is based on perl.

LDAP backend - we use a LDAP server for serving user ID.

Python, SQL & PostgreSQL - Our ERP program odoo is based on python, and postgresql.

Email servers - Management and understanding of setting up an email server.

Samba - Our file serving system is samba.

OpenVPN - How we connect to the server.

### Compensation:

Contract position will pay hourly, and be 15-20 hours/week. Conversion to full time includes benefits package and salary. Both contract and salary positions pay competitively.
